Re: Delinquent inspections and permits

The City of Abilene is considering the stoppage of issuing permits to contractors that have projects over 365 days old with no final inspections. Adopted codes and licensing laws regulate the requirement for necessary inspections in order to protect the health and life safety of the habitants and the general public. Failure to abide by the adopted laws is subject to penalties.

With this courtesy notice of the requirements, We are requesting contractors within the City of Abilene to get the required inspections in order to properly close out permits.

If you should have any questions or concerns, please feel free to give our Building Inspections Department a call @ 325-676-6232.

Sincerely,

A handwritten signature in black ink, appearing to read "Timothy A. Littlejohn".

Timothy A Littlejohn
