Re: New Development

08/22/2017

To whom it may concern,

As a reminder the City of Abilene will not issue any building permits for new developments until all public improvements have been completed and approved. This shall include the completions of water, sewer, curbs, gutters, storm water system, detention facilities, streets, street signage, erosion control and required fire hydrants.

The completion of the development plays a vital role in the protection of health and life safety of the general public.

We appreciate the vital role you play in providing for a safe, quality, and sustainable environment within the City of Abilene.

Thank you,

Timothy A Littlejohn
Chief Building Official
City of Abilene
