

A GUIDE TO MASK USE

Before putting on a mask, clean hands with alcohol-based hand rub or soap and water.

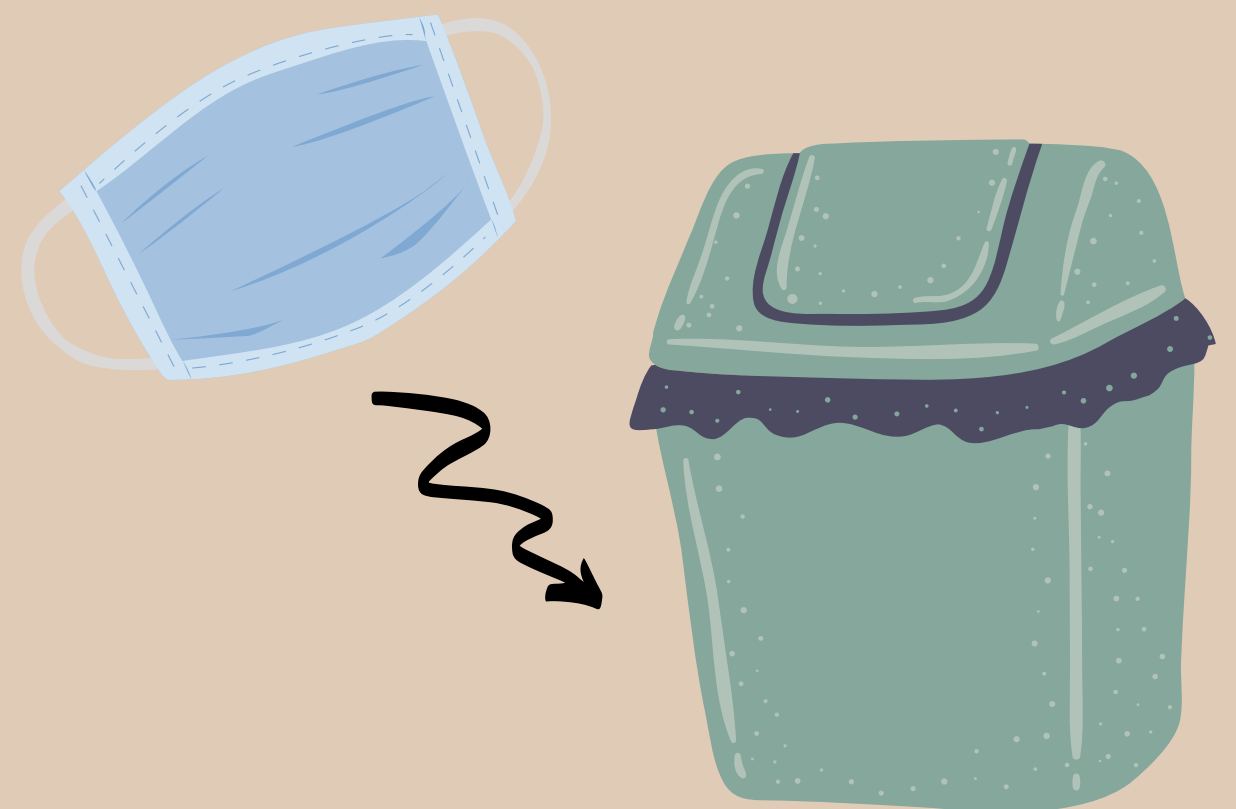

Cover mouth and nose with mask and make sure there are no gaps between your face and the mask.

Cloth face masks & coverings can be used. Wash cloth mask frequently in hot water.

For all other types of masks replace the mask with a new one as soon as it is damp and do not re-use single-use masks.

To remove the mask: remove it from behind (do not touch the front of mask); discard immediately in a closed bin; clean hands with alcohol-based hand rub or soap and water.

WHEN TO USE A MASK

Wear a mask when you are in public and around other people (outside your home, in a bus, in stores, at work) and when taking care of a person who has or is suspected to have Coronavirus.

Wear a mask if you are coughing or sneezing.

Masks are effective only when used in combination with frequent hand-cleaning with alcohol-based hand rub or soap and water.

If you wear a mask, then you must know how to use it and dispose of it properly.

Cloth face coverings should not be placed on children under age 2 and anyone that will not be able to remove the mask without assistance.
